FATAL FACTS

ELEVATOR INDUSTRY WORK PRESERVATION FUND 7154 Columbia Gateway Drive, Columbia, MD 21046

Fatal Facts

1) In this packet you will find a brief description of an accident involving an Elevator Constructor.
2) The scenario is recreated in part from an OSHA report.
3) The photo is not a part of the OSHA report but is intended to give a visual representation of the location of the accident.
4) Separate the class into groups of 4-8 people. It's recommended that one company representative sits and participates with each group.
5) Write in YOUR Individual Recommendation and Prevention, then you will have a class discussion about the individual recommendations. After the class discussion, you will Research your Company Safety Policy and fill in the Company Recommendations and Preventions followed by a discussion about the company policy and procedure.

6) DO NOT WRITE YOUR NAME ANYWHERE IN THIS BOOKLET

They are for safety awareness purposes only and should not be read to suggest or imply any legal causation, responsibility or liability on the part of any person or entity. They may not be used for discipline of any employee."

Fatal Fact #4

Brief Description of Accident: (Per the OSHA Report)

A mechanic was servicing an elevator. He was above the pit area, just inside the doors of the elevator on the first floor of an eight-story building. He had parked the elevator on the second floor and then gone to the first floor, reportedly to work on a defective slow down switch. While working or leaving the area, he apparently moved the switch and it appears to have sent a signal to the elevator that it was on or approaching the first floor. The elevator, which was still on the second floor, closed its inside door and descended to the first floor, trapping Employee #1 between the wall and the pit ladder on the first floor. He was crushed and killed. The elevator was not locked out.
